

Experience

I build digital experiences that constantly question how form sharpens function. My curiosity leads me to simplify flows into products people find lovable and purposeful.

Marketing and Communications Designer

KSTONE

2025 - Present

Ran market research, strategy and audience segmentation, built various brand collaterals, catalogues, and campaigns end to end, carried across print, social, and physical showroom displays as one visual system.

Projects

Petch

Gamified AI Health Companion

2026

Petch is a gamified AI health companion app for young adults, built on the Digital Omotenashi framework. Personalised health education, daily learning check-ins, and missions that bridge the knowing–doing gap.

Refine

Gesture-based AI Utility

2026

Inline AI editing as a gesture rather than a conversation. A line, a box, and a point can be surfaced and turn the cursor into the interface for rewriting, reading, or acting on whatever sits under it.

Skills	UX Skills	UI Skills	Softwares
	Problem Framing	Design Systems	Figma
	Information Architecture	Branding	Cursor
	Journey Mapping	AI-Native Interfaces	Claude Code
	UX Writing	Mobile & Responsive	Affinity
